5. Prescription Settings: this data should be dynamic.

The screenshot shows the 'Prescription Settings' form in the Nirvar application. The form is divided into four sections: Header (Left), Header (Right), Footer (Left), and Footer (Right). The Header (Left) section contains a text area with the following HTML code: `Dr. Zoltu
MBBS
Gynecology, General Physician
BMDC Reg. No - 74695
`. The Header (Right) section is empty. The Footer (Left) section is empty. The Footer (Right) section contains the text 'Powered by Nirvartech 222'. A 'Save' button is located at the bottom left of the form. The left sidebar shows the navigation menu with options: Dashboard, Appointment, Prescriptions, Patients, Drugs, Diagnosis Tests, Billing, Users Management, and Settings.

6. Drug: 'note' input and update not working.

The screenshot shows the 'Edit Drug' form for 'Nimocon 500' in the Nirvar application. The form has three input fields: 'Trade Name *' with the value 'Nimocon 500', 'Generic Name *' with the value 'Azithromycin', and 'Note' which is empty. A 'Save' button is located at the bottom left of the form. The left sidebar shows the navigation menu with options: Dashboard, Appointment, Prescriptions, Patients, Drugs, Diagnosis Tests, Billing, Users Management, and Settings.

7. Chief complaint: this input data is not updating

The screenshot shows the 'Patient information' and 'Chief Complaint' form in the Nirvar application. The 'Patient information' section shows the patient name 'LILLIAN HOLLOWAY' and an 'Update Prescription' button. The 'Chief Complaint' section has a text area with the value 'Laboris nemo minima'. Below this, the 'Drugs list' section shows three input fields: 'Ad facere fugit eo', 'Duomeal', and 'Minima pariatur Rec'. The left sidebar shows the navigation menu with options: Dashboard, Appointment, Prescriptions, Patients, Drugs, Diagnosis Tests, Billing, Users Management, and Settings.

8. Need to fix these errors.

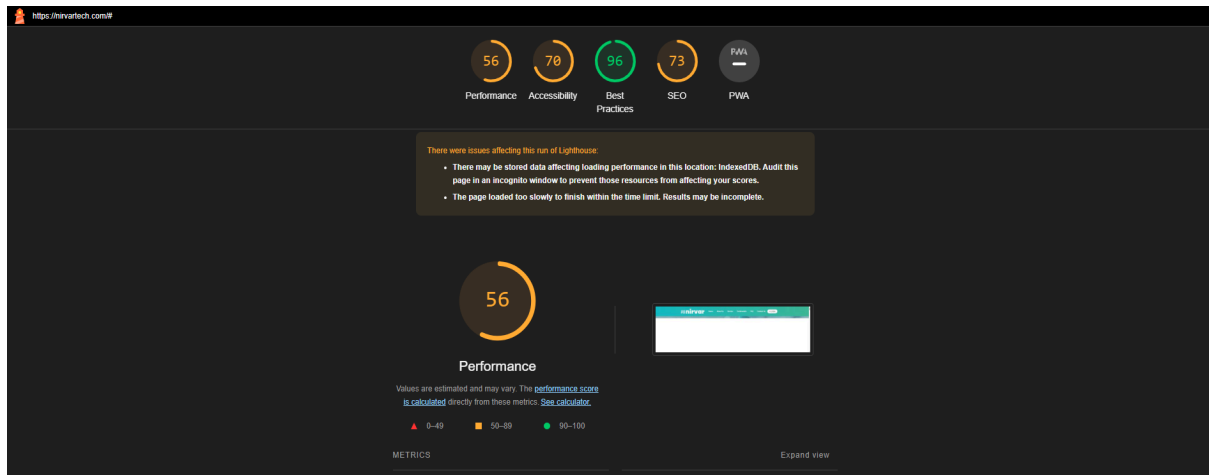

The top screenshot shows a RuntimeException error on the page `app.nirvartech.com/appointment/create`. The error message is: "Please provide Nexmo API credentials. Possible combinations: api_key + api_secret, api_key + signature_secret, private_key + application_id, api_key + api_secret + private_key + application_id, api_key + signature_secret + private_key + application_id". The URL `https://app.nirvartech.com/appointment/create` is also displayed. The stack trace shows the error originated in `Nexmo\Laravel\NexmoServiceProvider::raiseRuntimeException` at line 274.

The bottom screenshot shows an Error on the page `app.nirvartech.com/prescription/pdf/16`. The error message is: "Class 'PDF' not found". The URL `https://app.nirvartech.com/prescription/pdf/16` is also displayed. The stack trace shows the error originated in `App\Http\Controllers\PrescriptionController::pdf` at line 180. The code snippet around the error is:

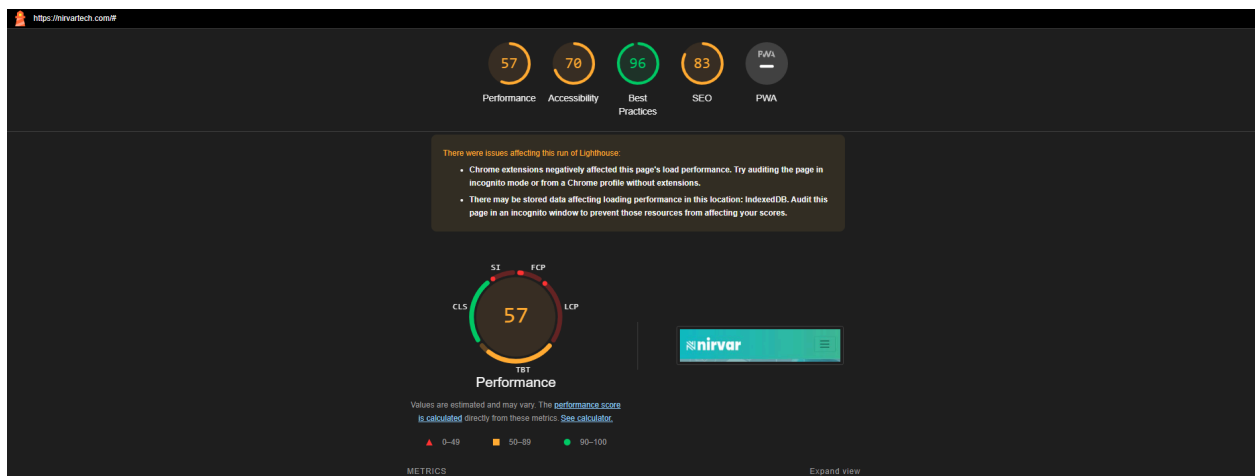

```
$prescription_tests = Prescription_test::where('prescription_id', $id)->get();  
$advice = Advice::where('prescription_id', $id)->get();
```

FRONTEND

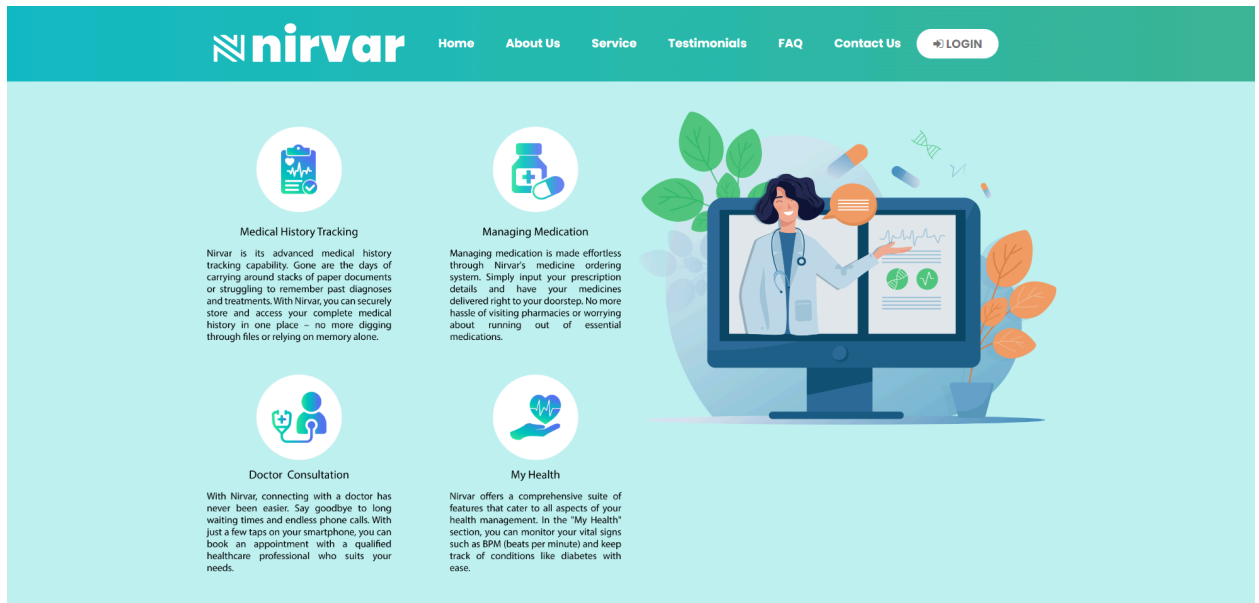

1. Desktop Performance

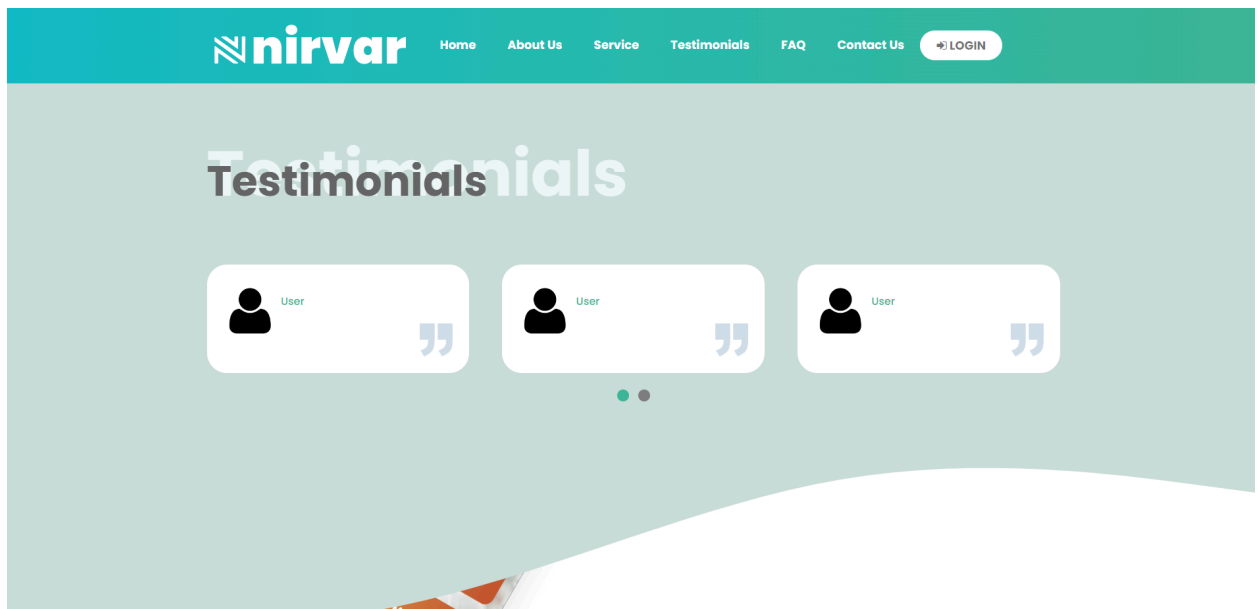

2. Mobile Performance

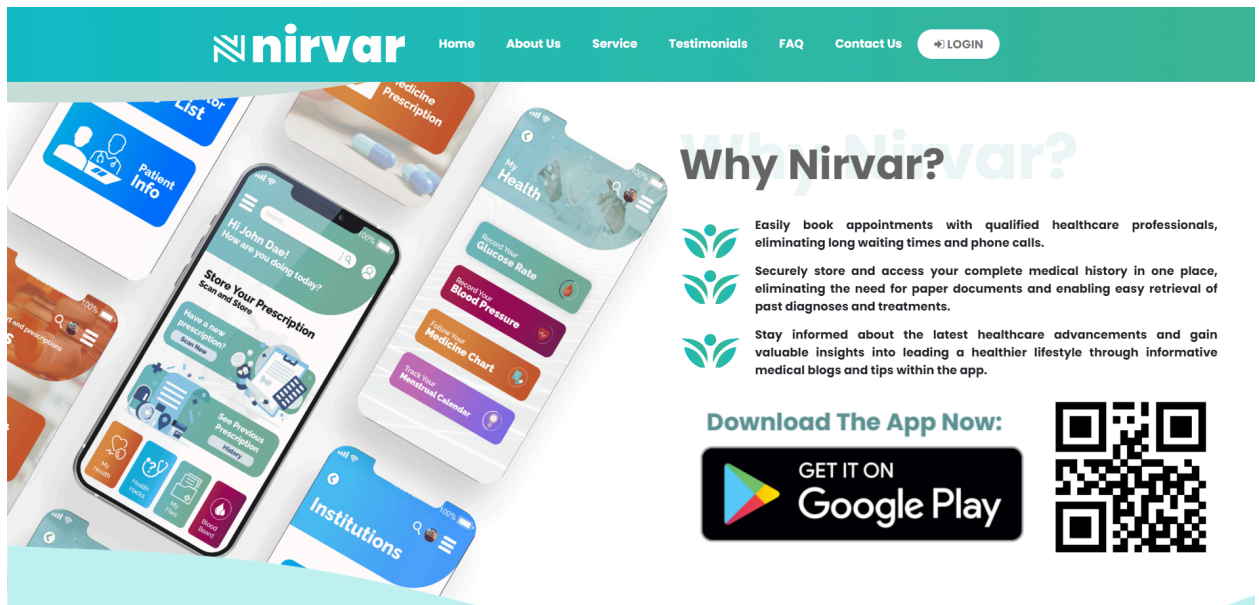

3. Service Section: this is a png image, for better clarity of the text it is recommended to change the image format.

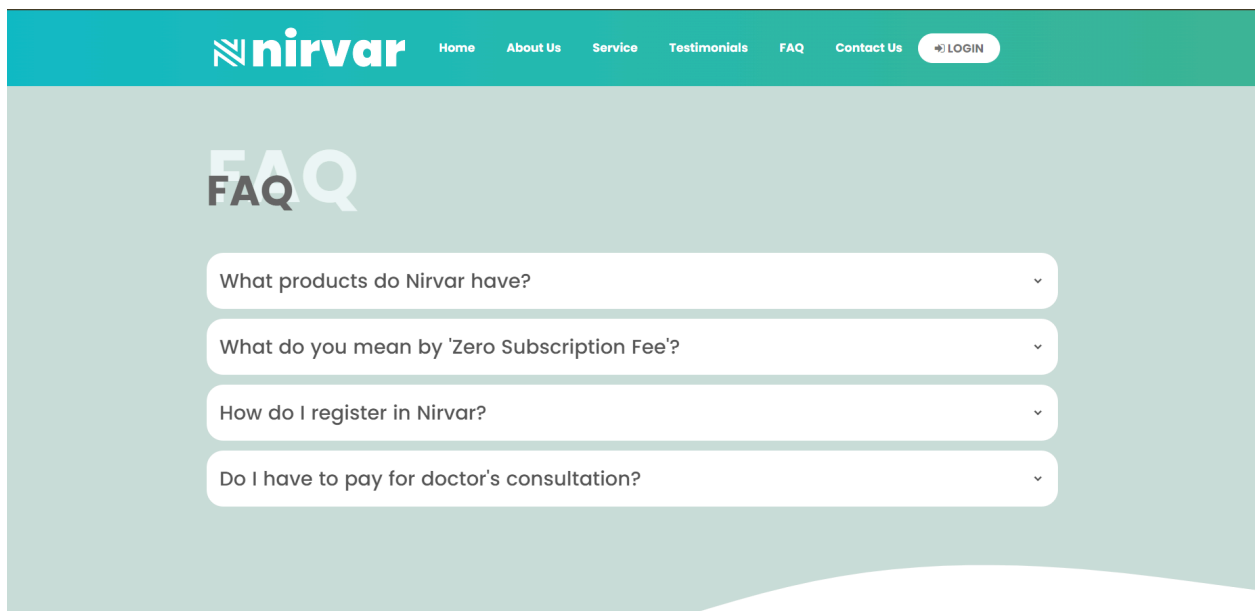

4. Testimonials: this section is not dynamic

5. QR code is not working

6. Faq: text size should be smaller for better user interface

7. Contact: follow us, download, privacy policy and contact us links are not working.
